

Sponsorship Package

LEVS-2017

2nd World Light Electric Vehicle Summit
Rotterdam, 22nd - 23rd November 2017

There are clearly a lot of activities related to light electric vehicles happening all around the world but no one can find a place where the different actors could meet to:

- learn from each other's experience;
- present their work and achievements;
- find partners to develop synergies & build new projects;
- join forces to lobby relevant authorities to get support.

LEVS, as the World Light Electric Vehicle Summit, therefore, aims at providing a premier & high quality global platform to foster exchange of views between R&D actors, industry, authorities, end-users and NGO's in the field.

Strategies for light electric vehicles development will also be discussed & defined for further actions.

Be part of this adventure!
